

## Directors' Review

The Board of Directors (the Board) is pleased to present the condensed interim unconsolidated financial statements of Pak Libya Holding Company (Private) Limited (the Company) for the period ended 30 June 2021 together with Directors' review thereon.

### Performance review

The Company generated profit before tax of PKR 193.60 million during the period under review as compared to PKR 561.61 million in the corresponding period last year.

Gross mark-up income during the period was PKR 1,467.84 million compared to PKR 1,782.28 million last year; the decline in interest income was due to sharp decline in policy rate to dampen the impact of COVID-19 pandemic on economy. However, net interest income (NII) has increased by PKR 46.87 million mainly due to the movement in interest rates and its effects on Company's margin.

During the period, the Company (utilised)/generated net cash flows of PKR (92.29) million from its operations as compared to PKR 3,195.35 million in corresponding period mainly due to increase in assets portfolio/borrowing. The total assets of the Company have increased to PKR 41,110.56 million – an increase of around PKR 4,100.11 million (compared to financial yearend 2020) mainly in credit and investment portfolios.

The summarised financial results for the period are as follows:

Description	Half year ended 30 June 2021	Half year ended 30 June 2020
	PKR '000	
Profit/(loss) before taxation	193,600	561,605
Taxation	20,864	140,768
Profit/(loss) after taxation	172,736	420,837
Earnings/(loss) per share (Rupees)	213.51	613.38

### Future prospects

The economic disruption resulting from the ongoing pandemic caused great uncertainties for businesses around the Country. Despite such uncertainties, the Company has shown great resilience by achieving its certain strategic objectives.

After the resolution of long outstanding critical issues of MCR and disposal of KEL assets, we hold a firm stance towards our future business strategy and outlook. Establishing a continuous income stream through economic use of Power Plant (non-banking assets) and related disposal, deposit mobilisation as stable funding source and determination to increase the advances portfolio, being the core activity, we understand and believe that the Company will be able to achieve its target of sustainable profitability and long term growth.

In terms of recoverability of investment in TFCs amounting to PKR 398.58 million, the management has evaluated overall situation vis-à-vis issuer Bank's intention and ability to pay; accordingly, concluded that both the elements exist as it acknowledges the debt and there are no restrictions on its operations while the payment is delayed due to its minimum capital requirements. In this regard, SBP has given its final approval for the period till 27 October 2020 however the issuer Bank requested a separate in-principal approval (similar to prior year) for the period covering till 27 October 2021.

Therefore, management has not provided any impairment on the said TFCs on subjective basis due to the recent developments & negotiations, and has been following up for the amicable resolution of the matter and complete recovery.

Moreover, new long-term credit lines are being negotiated to fill in the liquidity gaps and to ensure contingency funding planning. The management is focusing on all possible avenues for profitable operations of the Company including recovery efforts for troubled and non-performing assets which are a source of potential earnings.

In view of the efforts being made by the management we are optimistic about our Company's future growth, profitability and sustainability.

#### **Acknowledgments**

## **Introduction**

We have reviewed the accompanying condensed interim statement of financial position of **Pak Libya Holding Company (Private) Limited** (the Company) as at June 30, 2021 and the related condensed interim profit and loss account, condensed interim statement of comprehensive income, condensed interim statement of changes in equity and condensed interim cash flow statement and notes to the condensed interim financial statements for the six-month period then ended (here-in-after referred to as the "condensed interim financial statements"). Management is responsible for the preparation and presentation of the condensed interim financial statements in accordance with accounting and reporting standards as applicable in Pakistan for interim financial reporting. Our responsibility is to express a conclusion on this interim financial statements based on our review.

## **Scope of Review**

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

## **Basis for Qualified Conclusion**

Based on information provided to us by the management, Investments in condensed interim financial statements (refer note 9.1.5) include term finance certificates (TFC) amounting to Rs. 398.58 million (December 31, 2020: Rs. 398.58 million). We were unable to obtain sufficient appropriate evidence to determine the recoverability of these TFCs. There are no other sufficient alternative procedures that we could adopt to determine whether any allowance for non-recovery of the amount should be made in these condensed interim financial statements for the period ended June 30, 2021. Adjustment to the figures described above might have consequential effects on the Company's results for the half year ended June 30, 2021 and the condensed interim financial position of the Company as at June 30, 2021

and the related disclosures presented in the condensed interim financial statements and minimum capital requirement.

### **Conclusion**

Based on our review, with the exception of the matter described in the preceding paragraph, nothing has come to our attention that causes us to believe that the accompanying interim financial statement is not prepared, in all material respects, in accordance with accounting and reporting standards as applicable in Pakistan for interim financial reporting.

### **Emphasis of Matter**

We draw attention to the following matter:

Refer note 14.2.1, 14.3.2 & 37.2 to the accompanying condensed interim financial statements relating to the company's plan and actions for disposal and provision of asset relating to Kamoki Energy Limited (KEL).

Our conclusion is not modified in respect of the above stated matters.

### **Other Matter**

The figures of the condensed interim profit and loss account and the condensed interim statement of comprehensive income for the three months' period ended June 30, 2021 and June 30, 2020 have not been reviewed, as we are required to review only the cumulative figures for the six months' period ended June 30, 2021.

The engagement partner on the review resulting in this independent auditor's review report is **Muhammad Shaukat Naseeb**.

9.1.1 This represents 50% shareholding in the ordinary shares (Rs.10 each) of Kamoki Energy Limited (KEL), which has been fully provided. The book value represents cost of investment amounting to Rs. 500 million less share of loss on interest in joint venture amounting to Rs. 95.133 million upto 30 June 2012. This investment was designated as strategic investment under the Prudential Regulations for Corporate / Commercial Banking.

9.1.2 These include preference shares amounting to Rs.300 million which are cumulative, convertible, redeemable and non-participatory carrying dividend at the rate of 17% per annum having face value of Rs.10 each. These were redeemable within four years of the allotment date. If preference shares are not fully redeemed by the issuer in this time period, the remaining part along with the unpaid dividend thereon would be convertible at the option of preference shareholder at par value of Rs.10 into ordinary shares ranking pari passu in all respects with the ordinary shares except for participation in dividend / bonus distribution for the period for which preference share dividend has been paid.

9.1.3 It includes unlisted ordinary shares of FTC Management Company (Private) Limited. FTC Management Company (Private) Limited was incorporated in Pakistan. It is engaged in managing, operating and maintaining building housing offices with the name Finance and Trade Centre (FTC) for the mutual benefits of its owners and thus providing a nucleus for all joint and common services which are available in the FTC situated in Karachi.

9.1.4 It includes unlisted ordinary shares of Kamoke Powergen (Private) Limited (KPL). It was established as a Special Purpose Vehicle (SPV) to obtain power generation license from NEPRA to increase the saleability of assets of KEL. SBP's approval was obtained for the formation of KPL which was granted vide letter No. BPRD/RPD/27366/16 dated 16 November 2016. In 2020, the Company has disposed off its major shareholding and transferred management control, therefore, the subsidiary has become an associate.

- 9.1.5 It includes an investment in listed term finance certificates (TFC) amounting to Rs. 398.58 million comprising 79,955 units. During last quarter of the 2018, upon maturity, the issuer informed investors the status of minimum capital requirements and its pending merger with and into another Bank. As a result, issuer could not make the final payment of its mark-up and entire principal amount. Consequently, an extraordinary meeting of the TFC holders was held on 19 November 2018 wherein the majority of the TFC holders agreed to extend the maturity date of the TFC Issue for a period of one year (27 October 2019) on the existing terms and conditions as the counter party invoked the lock-in clause governed by clause 4.1.1 of the 'Declaration of Trust' to hold the payment till the minimum capital requirement is met. The clause is mandatorily invoked for the time being until proposed merger; however, the pending merger had been called off and the Bank started working to resolve the issue. Therefore, another extraordinary meeting of the TFC holders was held on 20 November 2019 wherein, considering the developments, the majority TFC holders agreed to extend the maturity of the TFC Issue for a period of another one year (27 October 2020) on the same terms.

Considering the delay in resolution, the TFC holders again agreed to extend the maturity period for another year ending 27 October 2021 so the Bank could finalise new arrangement with the investors for equity injection. The Bank acknowledges the debt and related mark-up as payable on the TFC Issue in its latest available financial statements.

In this regard, SBP has given its final approval for the period till 27 October 2020 and also given a separate in-principal approval for the period covering till 27 October 2021.

The management has evaluated overall situation vis-à-vis Bank's intention and ability to pay; accordingly, concluded that both the elements exist as it acknowledges the debt and there are no restrictions on its operations while the payment is delayed due to its minimum capital requirements. Therefore, management has not provided any impairment on the said TFCs on subjective basis due to above facts and the recent developments & negotiations, in these financial statements.

## 37 FAIR VALUE MEASUREMENTS

The fair value of quoted securities other than those classified as held to maturity, is based on quoted market price. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of the break-up value of these investments as per their latest available audited financial statements.

The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities, fixed term deposits and borrowings cannot be calculated with sufficient reliability due to the absence of a current and active market for these assets and liabilities and reliable data regarding market rates for similar instruments.

## 37.1 Fair value of financial assets

The Company measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:

**Methodology and Valuation Approach**

For the purposes of valuation, valuer carried out inspection and survey of the land, building, plant and machinery. They verified the capacity of the Engines and Alternators from their nameplate rating. The plant is mostly second-hand and the engines have run 50/60,000 hours.

**Land**

The valuer verified the land by examining the land purchase/ ownership documents or copies thereof, apart from physical verification. The valuation of land is based upon prevailing market rates for similar usage without any restrictions for sale, transfers, etc. for large areas and the prevailing market condition at the location. For this purpose the valuer also made inquiries from the local dealers of the area and assessed the value at Rs.56.500 million (31 December 2020: Rs.56.500 million).

**Buildings And Civil Works**

All civil works were physically inspected to ascertain the type of construction, finishes and present condition. The structures covered are the owned and developed assets on owned land and long leased land holdings. The verification was also made from the architectural drawings and completion drawings as available. The buildings were checked to ascertain the maintenance standard and construction at site in accordance with the drawings. A suitable depreciation factor depending upon the present condition and life of the buildings was applied to arrive at the present assessed value is Rs.150.570 million (31 December 2020: Rs.150.570 million).

**Plant and Machinery including Spares**

The machinery at the site (including spares) were physically verified as far as possible, according to their description, specification and location. Purchase invoices were used in order to determine the historical cost.

For the purpose of valuation of plant, machinery and equipment, valuer enquired values of second-hand machinery and checked their own archives, apart from the local market, keeping in view the make, model, capacity & present condition of the plant, which resulted in valuation of Rs.1,363.009 million (31 December 2020: Rs.1,363.009 million).

As the machinery items are also lying at the port and segments are distributed into various containers at the Plant site, this will present some problems in assembling and in absence of comprehensive assembly drawings and technical specification / rusting problems, the realisable value will suffer.

At year end 2018, the Company performed an impairment review to ascertain that the carrying amount of the power plant does not exceed its recoverable amount; the review was based on a financial model with various assumptions, as the power plant has not started its operations yet. Considering the assets being non-operational, the management engaged an external valuation expert to assess the value of these assets. As a result of the assessment, the management considered that no impairment on these assets is required for the year ended 31 December 2019, as the revised market/assessed as well as forced sales values based on the report of valuation expert, exceeded their carrying values as at 31 December 2019. Consequently, as per new valuation at year end the assessed value is Rs. 2,530.518 million (31 December 2020: Rs. 2,530.518 million).

Management of the Company, during the year 2020, after critically evaluating its options finalized the terms of restructuring deal for the disposal of these non-banking assets with a specialized engineering firm. Under the arrangement, both the parties agreed to enter into a business venture whereby the assets of KEL would be used for setting up of captive power plants to be used for industrial units through power purchase agreements on 'Build Own Operate' or 'Build Own Operate Transfer' basis.

As per the agreement, the total consideration will be paid from the power plant cashflows to be received time to time and on such dates and with such amounts as mutually agreed by the parties. The parties involved, currently, negotiating the terms of power purchase agreement (PPA) with identified buyers which will become the basis for relevant PPAs expected to be signed in due course accordingly.
